In terms of privacy, you don't have to worry much about UltraSurf keeping logs of your data.. Essentially, UltraSurf is more of a proxy, rather than a VPN There is a new IP address that is issued when you start using the program, but you must make sure you check the browser that you're using for any security flaws.. HTTPS is the common security protocol for internet browsing If you visit a site without that extra S on it, you could be vulnerable to security threats.. I used several other programs that have the same proposals but it was a big waste of time.

Goodbye censorship, hello privacy UltraSurf 's original purpose was to overcome the Great Wall of China, the virtual one of course, that prevents access to certain pages and online services.. Safety and privacyThis service is completely safe to use, assuming that you use it appropriately.. While you can access the web without having to worry about geoblocking, there are many aspects of this software that separate it from a traditional VPN.. UltraSurf provides privacy right from the beginning Although the browsing speed is a bit slower, with a good connection the difference is minimal.. You just have to open it and it starts working Another advantage is that you don't have to install it, so you can always take it with you in a USB flash drive or memory. [Move Copy Excel For Mac](#)
